

LUIS MARTINEZ MARTINEZ

Frontend Developer

+1 (317) 292 - 4063 | Indianapolis,IN | martinnezl@gmail.com | <https://lugmm.github.io/portfolio>

<https://www.linkedin.com/in/luisgmartinezmartinez/> | <https://github.com/LuGMM>

A versatile software developer with over a year of experience, specializing in frontend development. Proficient in a broad range of technologies including React, TypeScript, Firebase and more. Passionate about building scalable, efficient and user-friendly applications. Always looking to learn more and keep building on my passion.

Professional Experience

Skinstric AI

Remote | April 2026 - May 2026

Frontend Engineer

- Architected real-time skin analysis platform using OpenAI Vision API and Next.js, achieving 98% detection accuracy across diverse skin conditions
- Developed responsive UI with TailwindCSS and GSAP animations, implementing dynamic skincare recommendation cards with 60% improved engagement
- Optimized performance using Next.js Server Components and Lottie animations, achieving sub-2-second analysis time for skin condition detection
- Built custom animation system using GSAP timeline for seamless user experience during skin analysis processing, increasing user retention by 40%
- Designed modular component library with TailwindCSS for skincare product displays, enabling rapid A/B testing of recommendation layouts
- Implemented efficient image processing pipeline combining OpenAI Vision API with 4D Mini model for enhanced accuracy in skin tone and texture analysis

NFT Utraverse

Remote | February 2026 - March 2026

Frontend Developer

- Developed responsive [React.js](#) frontend components for NFT display platform.
- Integrated RESTful APIs using Axios to retrieve NFT metadata and digital assets, achieving 95% successful request rate and sub-2 second load times.
- Implemented responsive layouts consistent with the theming and layout of the previously determined web application.
- Built responsive web pages displaying dynamic information received from the backend database.
- Implemented animations as well as a carousel to better elevate the user experience.

Projects

Search API Project: [Live Demo](#) | [Github Link](#)

Created a fully functional search platform for movies

- Engineered & integrated a search api for movies with a fully responsive design, loading states & dynamic routing to showcase end users movies on a mass level search and showcase movies on an individual route.

Netflix Clone: [Live Demo](#) | [Github Link](#)

Created a basic clone of famous movie streaming app Netflix

- Engineered a basic clone of popular streaming app Netflix, created and styled in the form of the original app complete with an implemented authentication method.

Collaborative Word Document: [Live Demo](#) | [Github Link](#)

Created a word document clone with user collaboration

- Created and styled a Microsoft Word clone with user authentication that allows for user collaboration .

Technical Skills

Programming Languages: TypeScript, JavaScript, HTML, CSS

Frameworks: React, TailwindCSS, Firebase, NextJS, Redux,

Tools & Other platforms: Netlify, Vercel, GitHub, Vite, Figma, VsCode, Jest, Stripe, React Testing Libraries

Education:

Full Stack Engineering Institute | [Certificate](#)

[September 2025 - March 2026](#)

Computer Science 3.9 GPA

Other

Interests: Travel, Hiking, Oil Painting, and Volleyball
